## Indoor Air Quality & Product Transparency

Create Surface Design is dedicated to producing wallcovering that not only creates more beautiful interiors, but *healthier* interiors through improved indoor air quality (IAQ).

All product components used to make Create Wallcovering are not only made in the USA but pass the rigorous standards of the SCS Global Services Indoor Advantage Gold certification. SCS certification complies with CDPH/EHLB Standard Method v1.1 and conforms to CA 01350 to identify VOC emissions from interior products & finishes. The mill behind our wallcovering has received a "Pass" for school,

office & residential interiors, as well as being listed as an accepted product by the Collaborative For High Performing Schools (CHPS).

In addition, Create wallcovering meets the stringent EU standard EN 15102 for Decorative Wallcovering & complies with the Wallcovering Association's W-101 standard.

Following this document, you will find a list of chemicals (commonly found in vinyl wallcovering) - with associated health risks. You will also discover the healthy alternatives used to make our wallcovering; alternatives that enable us to make your walls as beautiful as your sense of well-being.
